

Salient Features

TIME TO GET BACK TO ROOTS

The Philosophy of THE CHEF STORY THROWBACK series is to bring a timeless look to a modern audience, evoking warm memories, whether you are cooking for yourself or your friends and family. Equipped with silicon sleeves, its unique yet familiar look will surely complement any kitchen.

100% Recyclable Iron

The body of the pots and pans are made from recycled iron thereby minimizing the impact on environment and contributing positively to the environmental balance.

Totally toxin free Product:

It has been significantly proven that cooking in cast iron cookware can significantly increase the iron content of your food, particularly food that has high moisture content and are cooked for a longer duration. The amount of iron transferred from the cookware to the food happens to be just enough to help in reducing iron deficiency, without causing any risk of iron overload in a healthy person.

Tempered Glass Lid with Silicone Rim

Extra strong tempered glass lid allows you to see the cooking process without lifting the lid, thus keeping the flavour and moisture in. These lids can sit upside down on the knob on the counter so that you can prepare food without fluid from the lid dripping or running and making a mess on the counter.

100% Eco-friendly Process

All the THE CHEF STORY cookwares are made in house. Our mission is to inspire people to eat better, live better, and achieve the life they desire. We believe great home-cooked meals and quality time spent with your family can lead to a fresh, healthier approach to life. The experience starts with us.

Super cool Silicone Sleeves

Silicon have better heat resistance (upto 200°C) than Bakelite handles and are germ free. The rubber like feel gives better grip and ease the cooking process.

Warranty

The Chef Story provides a lifetime warranty from the date of purchase to be free from defects in materials and workmanship under normal household use.

Uni Body

Uni-body: Ergonomically designed elongated handle with no screws, no rivets and no weld joints.

Cast Iron:

High heat retention and more energy saving. The CHEF STORY Cast Iron cookware is pre-seasoned with 100% vegetable oil to create non-stick surface over it.
